

TASKI[®] Solutions For Atriums, Cafeterias And Large Area Floors

TASKI[®] machines offer advanced cleaning technology, ergonomic design, ease of use and low maintenance. These features increase efficiency, efficacy and return on investment.

- Unlike other brands, TASKI[®] auto scrubbers eliminate “hidden” or uncleanable machine areas where pathogens linger, helping to reduce odors and risk of contamination. TASKI[®] machines also have fewer parts – for reliability, durability and less maintenance.
- TASKI[®] machines’ ergonomic design and safety features provide extra protection and comfort for operators. Superb maneuverability and braking reduce the possibility of accidents in operation. Likewise, batteries are isolated away from liquid tanks, out of reach during normal operation.
- TASKI[®] IntelliFlow™ and IntelliTrail[®] technologies ensure proper cleaning while reducing water/chemical usage, water trails, and labor costs while optimizing equipment utilization.
- Patented squeegees and direct pickup leave floors cleaner and dryer, reducing extra labor associated with trail mopping and baseboard cleaning while reducing the risk of slip and falls.
- TASKI[®] auto scrubbers and ergodisc 1200 extend floor care cycles and reduce the need for chemical stripping when used with Diversey floor finishes, cleaners and maintainers.

TASKI® Solutions For Atriums, Cafeterias And Large Area Floors

TASKI® swingo® 855B and 1255B Mid-Sized Walk-Behind Autoscrubbers

These auto scrubbers balance maneuverability and productivity. A dual-axle system allows these machines to literally turn on the spot.

Machines engineered for productivity, with easy operation and maintenance, plus excellent cleaning and drying results.

TASKI® swingo® 1650B and 1850B Large Walk-Behind Autoscrubbers

Newly improved, large, walk-behind auto scrubbers provide long work times and brushes that perfectly follow the floor profile for outstanding soil removal.

TASKI® Autoscrubber productivity features, combined with larger scrub paths for even greater large area efficiency.

TASKI® swingo® 2100micro and 2500B Ride-On Autoscrubbers

These auto scrubbers balance maneuverability and productivity. A dual-axle system allows these machines to literally turn on the spot.

Machines engineered for productivity, with easy operation and maintenance, plus excellent cleaning and drying results.

TASKI® swingo® XP-R and XP-M Stand-On Autoscrubbers

The new generation of TASKI® swingo® XP machines delivers the comfort of stand-on cleaning with all-wheel steering and unmatched visibility.

swingo® XP-R provides round disc cleaning for locations requiring intensive heavy duty cleaning.

swingo® XP-M offers micro rotational cleaning for locations where maximum autonomy is ideal.

TASKI® Intellibot® SWINGOBOT 1650™/ DUOBOT 1850™ Robotic Autoscrubbers

These autonomous hard surface scrubbers improve cleaning consistency and reduce cleaning costs.

TASKI® robotics solutions can double productivity, reduce water consumption and differentiate your organization.
