

TASKI®

TASKI® Solutions For Hallways and Corridors

TASKI® machines offer advanced cleaning technology, ergonomic design, ease of use and low maintenance.

These features increase efficiency, efficacy and return on investment. TASKI® machines leave floors clean, fresh and dry, contributing to a satisfying environment of care and enhancing your organization's image as a quality care provider.

Key Advantages:

- Unlike other brands, TASKI® auto scrubbers eliminate “hidden” or uncleanable machine areas where pathogens linger, helping to reduce HAIs.
- Modular machine design means fewer parts for greater reliability and durability, plus less frequent and easier maintenance.
- TASKI® auto scrubbers extend hard surface floor care life and eliminate chemical stripping when used with Diversey floor finish, cleaners and maintainers.
- Patented squeegees and direct pickup leave floors cleaner and dryer with no trail mopping or baseboard cleaning.
- TASKI® machines deliver operator comfort and safety features. Superb maneuverability and braking reduce accidents in operation. Batteries are isolated away from liquid tanks, out of reach during normal operation.
- TASKI® IntelliFlow™ and IntelliTrail® technologies ensure proper cleaning while reducing water/chemical usage and labor costs and optimizing equipment utilization.

TASKI®

TASKI® Solutions For Hallways And Corridors

TASKI® swingo® 855B and 1255B Mid-Sized Walk-Behind Autoscrubbers

These auto scrubbers balance maneuverability and productivity. A dual-axle system allows these machines to literally turn on the spot.

Machines engineered for productivity, with easy operation and maintenance, plus excellent cleaning and drying results.

TASKI® swingo® 1650B and 1850B Large Walk-Behind Autoscrubbers

Newly improved, large, walk-behind auto scrubbers provide long work times and brushes that perfectly follow the floor profile for outstanding soil removal.

TASKI® Autoscrubber productivity features, combined with larger, dual brush scrub paths for even greater large area efficiency.

TASKI® swingo® 2100micro and 2500B Ride-On Autoscrubbers

TASKI innovation built for healthcare. Easy stop, maneuverability, visibility – combined with versatility and safety. Smaller footprint and greater productivity than large walk-behind machines. The 2500B is especially robust for all-day cruising of large areas.

These micro machines are all about mobility and compact footprint. High productivity, maneuverability and flexibility across area cleaning programs. Easy to use, plus excellent cleaning and drying results.

TASKI® swingo® XP-R and XP-M Stand-On Autoscrubbers

The new generation of TASKI® swingo® XP machines delivers the comfort of stand-on cleaning with all-wheel steering and unmatched visibility around the machine.

swingo® XP-R provides round disc cleaning for locations requiring intensive heavy duty cleaning.
swingo® XP-M offers micro rotational cleaning for locations where maximum autonomy is ideal.

TASKI® Intellibot® SWINGOBOT 1650™/ DUOBOT 1850™ Robotic Autoscrubbers

These autonomous hard surface scrubbers improve cleaning consistency and reduces cleaning costs.

TASKI® robotics solutions can double productivity, reduce water consumption and differentiate your organization.
